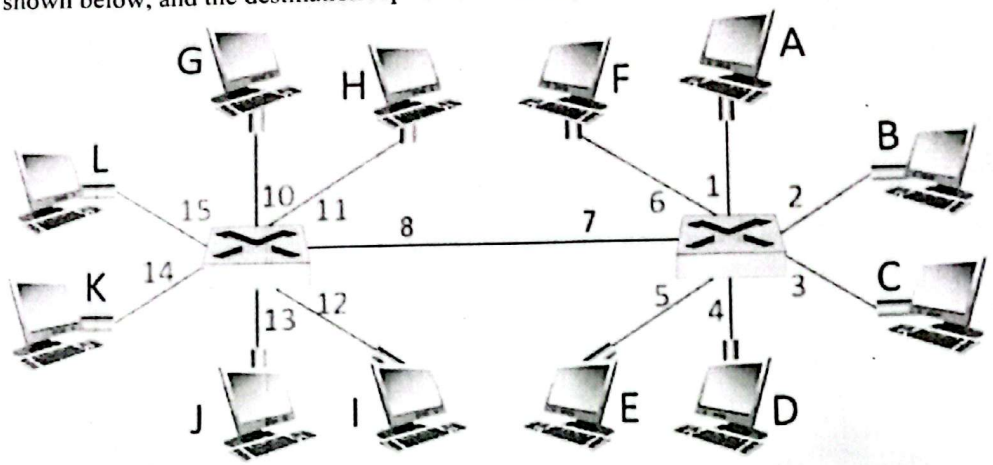
National University of Computer and Emerging Sciences, Lahore Campus

Course Name:	Computer Networks	Course Code:	CS 3001
Program:	BS (Data Science)	Semester:	Spring 25
Duration:	15 minutes	Total Marks:	15
Paper Date:	15 May -2025	Section	8A
Exam Type:	Quiz 6 - Chapter 6	Page(s):	3

Student Name Roll No. Section:

Q1. Consider the LAN below consisting of 10 computers connected by two self-learning Ethernet switches. At t=0 the switch table entries for both switches are empty. At t = 1, 2, 3, and 4, a source node sends to a destination node as shown below, and the destination replies immediately.



Assume that the following transmissions occur (the transmissions in reply occur but are not shown in the list below):

t=1: L -> G
t=2: H -> I
t=3: A -> K
t=4: B -> L

Fill out the two switch tables.

Mac	Interface	TTL
L	15	
G	10	
H	11	
I	12	

MAC	Interface	TTL
A	7	
K	8	
B	7	
L	8
